

# Bradley Kohler

B.ENG. MECHATRONICS ENGINEERING · 3 YEARS OF PROFESSIONAL WORK EXPERIENCE

Toronto, ON, Canada

✉ bradleykohler96@gmail.com | 📧 studentbrad | 🌐 studentbrad

## Skills

### Programming Languages

BASH  
C/C++/C#  
Python  
Java  
HTML/CSS/JavaScript

### Machine Learning

PyTorch  
TensorFlow

### Microprocessor Firmware

STM32  
Nordic  
Qualcomm  
Simulink

### Operating Systems

Linux  
AndroidOS  
mbedOS  
ChibiOS  
FreeRTOS

### Hardware Design

Verilog HDL  
NI Multisim  
Eagle

### Systems Design

AutoCAD  
SolidWorks  
Maplesim

### Computer Mathematics

Maple18  
NumPy  
Eigen  
MATLAB

### Continuous Integration

Docker  
TravisCI  
CircleCI  
Jenkins  
Bamboo

## Work Experience

### Labforge Inc.

[Waterloo, Ontario](#)

SOFTWARE & FIRMWARE DEVELOPER

*May 2020 - Present*

- Developed machine learning neural network structures, criteria, and optimization techniques; demonstrating good performance in the field.
- Designed and programmed new approaches to object re-identification and tracking in C/C++ and Python achieving fast results (100ms pipeline).
- Improved inertial sensor code bases in C/C++; running sensor processes as Unix systemd daemons on stereo cameras.
- Contributed in a corroborative effort with a team of software developers to a reliable C/C++ state estimation engine for stereo camera tracking.
- Communicated design ideas and coded with another software developer to create a robust C/C++ camera calibration software.

### Northern Digital Inc.

[Waterloo, Ontario](#)

ADVANCED RESEARCHER & FIRMWARE DEVELOPER

*May 2018 - Sept. 2019*

- Utilized mathematics skills to successfully design and program multiple data fusion algorithms in C/C++ and Python for 3D guidance systems (achieving NASA level TRL4) with real-time performance on offline systems (1-10ms pipeline).
- Worked collaboratively with a team of software developers to develop a fast C/C++ simulator (<10s) for a virtual reality headset/handremotes.
- Worked on custom hardware writing low-level firmware for sensors/peripherals including IMUs, ADCs, DACs, FLASH, UART, etc.
- Showed responsibility by coding CI/CD unit testing and deployment scripts for production products; automating testing using Bamboo/Jenkins.

### McMaster University

[Hamilton, Ontario](#)

ADVANCED RESEARCHER & TEACHING ASSISTANT

*May - Dec. 2015 & May - Sept. 2017*

- Demonstrated leadership in a team of software engineers by leading development for embedded C/C++ firmware on safety critical systems.
- Took responsibility for writing CI/CD unit testing and deployment scripts; automating testing using Docker/Gitlab Runner.

### Emnor Mechanical Inc.

[Hamilton, Ontario](#)

SOFTWARE DEVELOPER & MECHANICAL REPAIRMAN & SHOP EMPLOYEE

*May - Sept. 2015 & May - Sept. 2016*

- Demonstrated good organization skills by developing a Python inventory management software for the company warehouse.
- Improved mechanical design skills by reverse engineering damaged parts and producing CAD drawings using the Faro Arm.

## Education

### McMaster University

[Hamilton, Ontario](#)

MECHATRONICS ENGINEERING CO-OP

*Sept. 2014 - April 2020*

- McMaster Cumulative Grade Point Average 3.6/4.0
- McMaster Engineering Co-op Student of the Year Nominee

## Projects

### Bottlenose

[Waterloo, Ontario](#)

DEVELOPER

*May 2020 - May 2021*

- Authored solutions for detection, re-identification, tracking and estimating past, present and future states of known objects.
- Primarily coded in Python and C/C++ using popular computer vision libraries such as PyTorch, GTSAM, OpenCV, etc.

### Atraxa

[Waterloo, Ontario](#)

DEVELOPER

*January - Sept. 2019*

- Developed the low-level embedded firmware including sensor peripheral drivers, pipelines, and build system for virtual reality handremotes.
- Ported low-level firmware to ARM Cortex-M4 architectures for magnetic signal generation.

### Retina

[Hamilton, Ontario](#)

DEVELOPER

*Sept. 2019 - April 2020*

- Sped development on a wireless indoor navigation system by reverse engineering existing Bluetooth protocols in firmware packages.
- Demonstrated flexibility by learning JavaScript and modifying NodeJS backend services for indoor positioning, routing and navigation.
