Hometown

A little bit about my hometown Cambridge, ON, Canada.

- Cambridge is part of the Region Municipality of Waterloo, ON
- Cambridge is divided into three regions Preston, Hespler and Galt (home region)
- Galt was once called "Manchester of Canada" in the 1870's because of the extensive industry, powered by the Grand River

Interests in Engineering

Words that I live by:

"Beautiful is better than ugly. Explicit is better than implicit.

Simple is better than complex. Complex is better than complicated.

...

In the face of ambiguity, refuse the temptation to guess.

...

*Now is better than never. Although never is often better than **right** now.*

If the implementation is hard to explain, it's a bad idea.

If the implementation is easy to explain, it may be a good idea. " — Tim Peters

My engineering interests include but are not limited to:

- Beautiful, elegant design followed by powerful, practical implementation
- Creating the things that better our lives and do not make them **more** complicated
- Doing the things that benefit others and not just yourself
- Software and computers unless I'm debugging

Interests Outside of Engineering

Drawing and Art

I have always been a very artistic person; sketching everything from buildings to people and animals.

I view myself as an artist before a programmer because I pay very close attention to detail.

I like when people take the time to visually represent something because it helps my understanding.

Family and Friends

I am a very social person. I spend a lot of my time having fun with my friends and family.

Music and Piano

I have played the piano for many years and enjoy playing modern and classical music.

Music has had numerous benefits on my life including reducing stress and anxiety.

Automate Everything

If I can automate something in my life I will try to find the time to do it.

I like to write code on my spare time that makes my life a little easier.

The Future

In the future I hope to be a successful professional engineer, an educator to people who want to get involved in the digital world, an involved community member helping my friends, family and those who are less fortunate than others.
