Nominee's Bio

“Bradley Kohler is a fourth year student studying Mechatronics Engineering at McMaster university. Over the past ten months Bradley has worked as a member of the advanced research team at Northern Digital Inc. in Waterloo. He is an energetic student who learns quickly and works independently to produce high-quality solutions to challenging problems. Bradley has implemented several algorithms from idea to functioning proof of concept and achieving level 4 on NASA's Technology Readiness Scale. He has brought up several new PCB boards for the first time from NDI's prototype manufacturing shop enabling firmware teams to work on real hardware. He has written several low-level drivers to access data from inertial units, signal analyzers, touchpads and more. Bradley values teamwork and always shows a real passion to solving problems in multiple disciplines.”
