

Bradley Kohler

MECHATRONICS ENGINEER · UNIVERSITY UNDERGRAD

Waterloo, ON, Canada

✉ studentbrad.github@gmail.com | 📷 studentbrad | 🌐 studentbrad

Hometown

A little bit about my hometown Cambridge, ON, Canada.

- Cambridge is part of the Region Municipality of Waterloo, ON
- Cambridge is divided into three regions Preston, Hespeler and Galt (home region)
- Galt was once called "Manchester of Canada" in the 1870's because of the extensive industry, powered by the Grand River

Education

McMaster University

MECHATRONICS ENGINEERING CO-OP

Hamilton, Ontario

Expected Graduation April 2020

Galt Collegiate Institute

SECONDARY SCHOOL GRADUATE

Cambridge, Ontario

Sept. 2010 - June 2014

Interests in Engineering

Words that I live by:

*"Beautiful is better than ugly. Explicit is better than implicit.
Simple is better than complex. Complex is better than complicated.*

...

*In the face of ambiguity, refuse the temptation to guess.
There should be one — and preferably only one — obvious way to do it.
Although that way may not be obvious at first unless you're Dutch.
Now is better than never. Although never is often better than **right** now.
If the implementation is hard to explain, it's a bad idea.
If the implementation is easy to explain, it may be a good idea. " — Tim Peters*

My engineering interests include but are not limited to:

- Beautiful, elegant design followed by powerful, practical implementation
- Creating the things that better our lives and do not make them **more** complicated
- Doing the things that benefit others and not just yourself
- Software and computers unless I'm debugging

Interests Outside of Engineering

Drawing and Art

I have always been a very artistic person.
I tackle my life as though everything is a work of art giving it the care and attention to detail that it deserves.
I like to visually represent anything that I can as long as I have the time.

Family and Friends

I am a very social person. I spend a lot of my time having fun with my friends and family.

Music and Piano

I have played the piano for many, many years.
I love to play music and listen to music.
Music has had numerous benefits on my life including reducing stress and anxiety.

Automate Everything

If anything can be automated I will automate it.
I like to write code on my spare time that makes my life a little easier.

The Future

In the future I hope to be

a successful professional engineer,

an educator to people who want to get involved in the digital world and

a involved community member helping my friends, family and those who are less fortunate than others.
